DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 23, 24, 27, and 55 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding to claims 23, 24, 27, and 55, the claims called for a processor-readable “**medium**”, however in the specification the examiner found no such support for such “**medium**” and what it been positively disclosed as. Thus, the specification inadequately provided support for such subject matters and therefore lacks of enablement.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding to claim 34, the claim is incomplete, it seem though the claim is missing a period.

Response to Arguments

4. Applicant's arguments filed August 9, 2007 have been fully considered but they are not persuasive. Regarding to applicant's argument on pages 14-15 asserting the specification (page 17 lines 5-9) provided support for such processor readable medium is traversed. The citation provided by applicant and the entire specification only show support for a processor operated to execute instruction codes. The scope for such medium is not defined nor support in the specification. Thus, the specification fails to provide enablement for a medium as claimed.

Allowable Subject Matter

5. Claims 1, 2, 5-8, 11-19, 21, 22, 25, 26, 28-33, and 35-54 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or make obvious the steps of or means for **“comparing the detected average throughput against a threshold throughput, wherein the threshold throughput is based on a maximum supported average data rate”**, when such comparing is considered within the specific structure of the method recited in claims 1 and 40 or the device recited in claims 28, 45, and 50. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or make obvious the steps of or means for **“the message is covered by a null cover that indicates that data transmission is not requested by the receiving device”**, when such message is considered within the specific structure of the method recited in claim 11. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to

Art Unit: 2619

teach or make obvious the steps of or means for “**a controller coupled to the detector and operative to receive the status signal and generate a message requesting the transmission to stop the data transmission if the detected average throughput exceeds the threshold throughput**”, when such controller is considered within the specific structure of the device recited in claim 19.

6. Claim 34 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
